Instructions:

1. Cut out the cover insert, on page 1, around the outer perimeter. Do not cut along the center.
2. Fold the cover insert in half, with the text on the outside.
3. Insert the cover insert in the CD case cover.
4. Cut out the tray insert, on page 2, around the outer perimeter.
5. The right-most long narrow title "tab", on the tray insert, is for CD case with a transparent tray. Remove this "tab" if the CD case has an opaque tray.
6. Fold the left and right long narrow title "tabs" to a 90 degree angle, away from the main tray cover portion. If the right-most "tab" is retained for a transparent tray, fold that "tab" 90 degrees again, away from the title "tab" next to it. The text should appear around the exterior of the folded cover, not the interior.
7. Remove the tray from the case.
8. Place the tray insert in the case.
9. Insert the tray, being careful that the title tabs are flat against the case.
10. Please appropriately discard this portion and the scrap bits of paper.

Naudsonce

H. Beam Piper

Naudsonce

Naudsonce? What does THAT mean? Well, to find out you will need to listen to this story where Piper's unique mind explores what we mean by 'communication' and how it happens.

The joint Space Navy–Colonial Office expedition was looking for new planets suitable for colonization; they had been out, now, for four years, which was close to maximum for an exploring expedition. They had entered eleven systems, and made landings on eight planets. Three had been reasonably close to Terra–type but were all disqualified by terrible animals or warlike inhabitants. Now, finally here was an ideal world; their last chance before returning in disgrace.

Now the only thing was to get an agreement from the local king or whatever to the colonization.

Easy, right? Well first, you've got to talk to them and there the trouble starts. Listen to this captivating story by H. Beam Piper published in Analog Science Fact — Science Fiction, January 1962.
